

DATA SHEET

STORM BLASTER

FEATURES:

- Improved Blaster machine with new feeding system.
- It can suck 20 kg of confetti with 1 single bottle.
- Fully manufactured in Barcelona (Not imported).
- Flightcase of top quality.
- Wheels equipped with brakes.
- Trolley cart accessory available to carry the CO2 bottle together.
- 1 single person can then operate it and transport it.

APPLICATION AND CAUTION:

- STORM BLASTER is the must have machine on large events when needing to blow a large amount of confetti in very few time. Any other use, different from the written excludes Oh!FX (CONFETTISHOTS SLU) of liability and warranty.
- Use always the STORM BLASTER in open spaces or indoors with good ventilation.
- Never use it in enclosed spaces without ventilation because the concentration of CO2 can cause suffocation. If you have doubts about the features of the enclosure use a meter to measure CO2 concentration.
- Always use hoses and connections of the high pressure provided by the distributor and duly certified.
- Do not point directly at anyone at less than 4 meters away. Always keep a safety distance of 3 meters between the/s machine/s and the public.
- Use only the consumables intended for that specific use, and duly certified.
- Only one adult and qualified person must manipulate the machine.
